

Multi-Complete

Multi-Complete 45

Are You Recommending a Multivitamin with Iron to Your Patients?

MC 45 contains all of the vitamins and minerals that are in our original bariatric multivitamin formula PLUS 45 mg of iron per daily serving. This product meets the ASMBS guidelines* for patients who have had a Vertical Sleeve Gastrectomy or Gastric Bypass and are looking to avoid taking a separate iron supplement. This integrated formula provides maximum bioavailability as we carefully selected each vitamin and mineral level and form, to enhance interaction and absorption.

*Excluding calcium

Just had my one year surgery anniversary and had my bloodwork done, all my bloodwork is great thanks to these awesome vitamins!
- Pamela Nichols
